# The essence of speed

Mayla founders Christopher Gelsdorf (r) and Olivier Arnault (l)

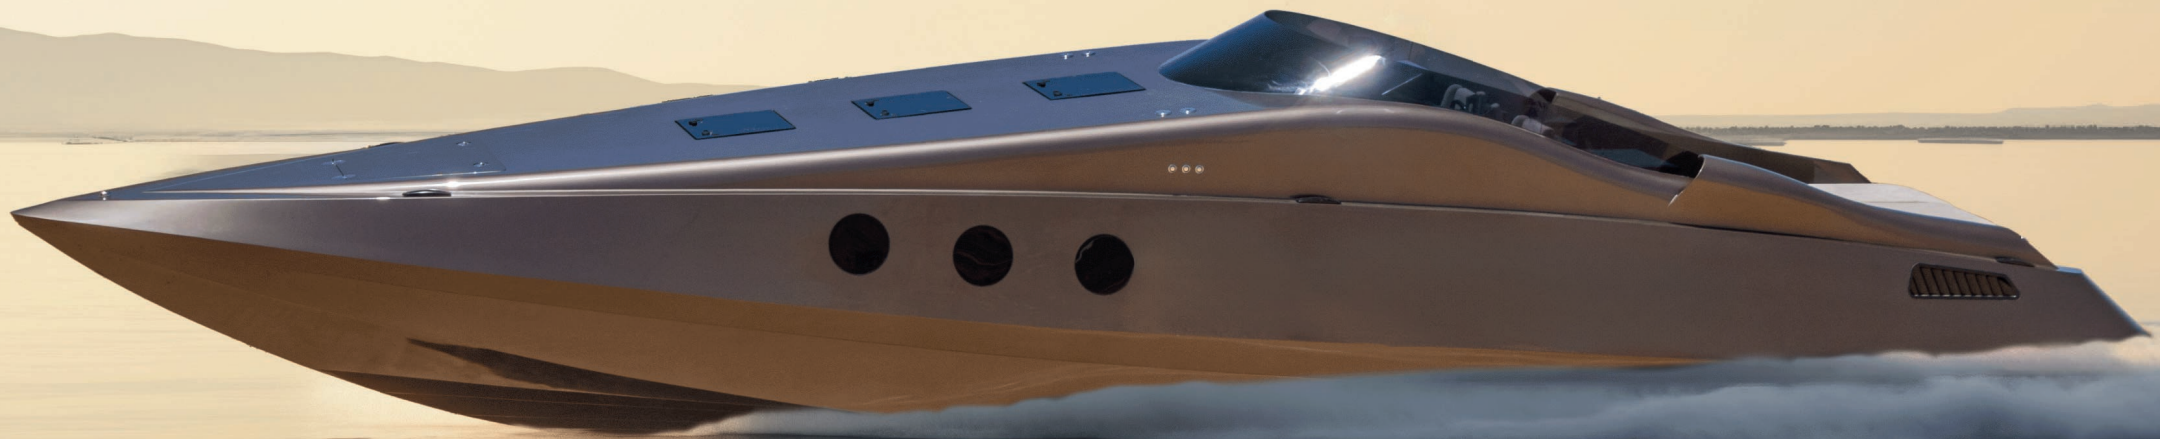

Mayla are high-performance, custom, full-carbon yachts.

The birth of Mayla marks a milestone in the luxury day boat segment. Mayla is a new symbol of innovation, exclusivity, sustainability, and performance.

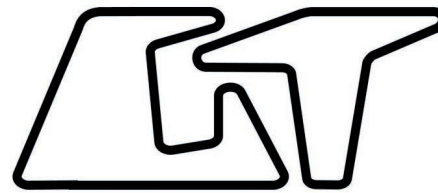

Mayla was founded by experts in the automotive industry. Passionate sailors and powerboat drivers, having helped renowned brands to optimize the launch and manufacturing of iconic sports cars, they committed to apply the best standards to yacht design, engineering and production.

The team surrounded themselves with the best experts and engineers available in yacht building. Together they engineered a yacht exceeding all expectations, uncompromisingly trimmed for offshore-seaworthiness, joy of navigation, safety and functionality.

MAYLA GmbH has its headquarters in Hamburg, Germany, home of a century-old, high-quality yacht-building tradition. A brand new facility has been established for the final finish and assembly in Weißwasser, Germany

# Birth of a legend

Mayla introduces the GT range, a long-awaited modern, luxury interpretation of the classic high-performance speedboat concept.

Mayla GT offers high versatility and an almost infinite number of possibilities to answer individual wishes, in terms of propulsion systems, layout, on-board features, and styling.

# Shaped for performance

Modern classic design.

The exterior design of Mayla GT is a present-day tribute to classical speedboats, sculpted by numerous hours of hydro and aero dynamics computer optimization.

The lines of Mayla GT have been carefully shaped to enhance comfort and practicality, enable generous interior space and a class-best storage capacity at this level of performance.

The interior of Mayla GT has been designed and furnished according to the highest standards of luxury yachts. Exterior and interior colors, materials and layouts can easily be customized according to specific needs.

# Limitless driving pleasure

Pure exhilaration.

The performance of Mayla GT are simply one of a kind. Mayla GT is significantly lighter and stiffer than most units in the market.

Innovative and powerful high-torque propulsion systems accelerate Mayla GT to speeds comparable to those of performance racing boats.

Hull and propellers are designed for a smooth and quiet ride, with fantastic throttle and steering response. At incredibly high speeds, the ride on Mayla GT remains safe, efficient and smooth.

# Exclusive comfort

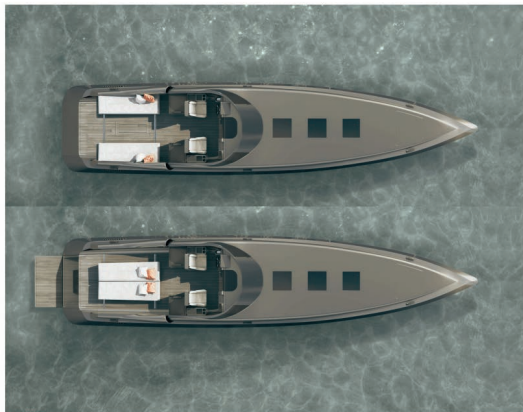

Unequaled versatility.

The ultimate luxury is time. Mayla GT has been conceived to enjoy every second of it, without condition. While riding, it provides the comfort, safety and protection to fully enjoy its exceptional performance.

At destination, the generous cockpit lounge, wet bar and open kitchen suddenly become everyone's attention. Toys such as jet skis, paddle boards or small dinghies are pulled out of the vast garage to enjoy a perfect day in the bay.

A simple, functional design with refined details and exclusive equipment will warmly accommodate selective guests for pure quality time.

The comfortable, loft-styled interior cabin with its vast lounge area, stand-up shower and separated toilet offers the perfect area and intimacy for a good, regenerative rest.

# Engineered efficiency

State-of-the-art engineering.

Mayla GT uses a Petestep® patented hull technology. Petestep® deflectors redirect the spray water more downwards and aft-wards compared to conventional spray rails, saving of up to 35% energy, lowering slamming by up to 50%, increasing stability and reducing noise.

Structural engineering is conceived and signed by an established composite engineering office. The structural elements, bulkheads and inside walls of Mayla GT are dimensioned to withstand speeds in the 100 knots range.

Mayla yachts are built to the highest specification in epoxy carbon prepreg and carbon-prepreg-foam sandwich. Mainly used in the aviation sector and for high-tech racing boats, the technology allows for a lower proportion and better distribution of resin in the composite, reducing weight and enhancing strength.

# Built to last

World-class manufacturing.

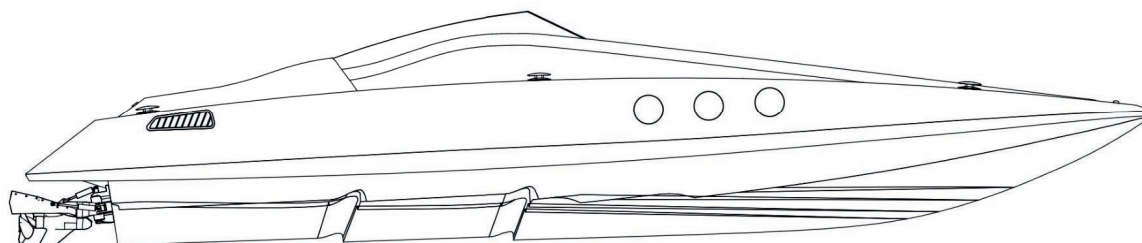

Mayla's founders share decades-long work experience optimizing processes at prestigious automotive manufacturers and their suppliers. The industrialization of Mayla has been defined along the very same operational excellence principles and the yachts assembly takes place in a state-of-the-art, new facility.

Mayla prides itself to achieve manufacturing tolerances in the millimeter range and superyacht quality standards.

No compromises were made in the suppliers' selection process. The team's approach has been to work only with leading, proven technologies and components of the highest possible quality.

# General specifications

Mayla 

## General dimensions

Length: 44ft  
Beam: 10ft  
Maximum capacity: 8 passengers  
Hull structure: Carbon prepreg

## Models

	<b>GTS</b>	<b>GTR</b>	<b>GTR-R</b>	<b>GTO</b>	<b>E-GT</b>	<b>E-GTR</b>
Propulsion:	Gas engines	Gas engines	Gas engines	Diesel engines	Electric	Electric-diesel hybrid
Weight:	3.8t	5.2t	5.2t	5.8t	5.8t	6.2t
Power:	2 x 650hp	2 x 1100hp	2 x 1550hp	2 x 850hp	2 x 1100hp	2 x 1100hp (e) + 400hp (d)
Cruising speed:	30kn	30-40kn	30-40kn	30-40kn	25kn	30-40kn
Top speed:	70+kn	80+kn	100+kn	70+kn	50+kn	60+kn

# Equipment and options

Mayla 

## Technics

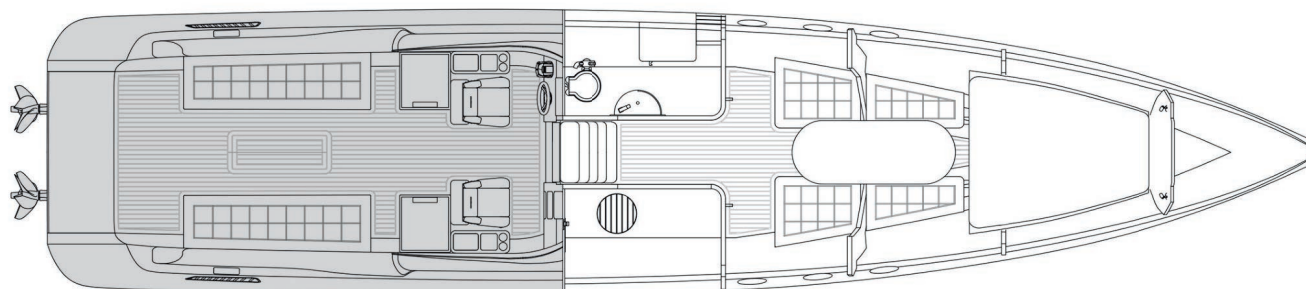

Petestep® hull design  
MSA® Surface Drive  
Seakeeper  
Generator  
Warm water preparation

## Digital

AI-driven backbone, App- and Cloud-based yacht management  
Update on-demand  
Remote yacht management via cell phone application

## Interior

Full queen-size bed  
Alcantara® seating, custom color  
Shower with full headroom, independent head  
Carbon table (option)  
Refrigerator (option)  
Air conditioning  
Mirror TV (option)

## Exterior

Variable deck layout (movable sunbeds and foldable table)  
Alcantara® seating, custom color  
Shock absorbing seats for maximum comfort and safety  
Carbon/Titan cleats

Wet-Bar with refrigerator, barbecue and sink  
Fast 'garage' with dual function: toy storage and beach club  
Esthec deck, custom color  
Full digital cockpit

Premium sound system  
Underwater lights  
Night vision system  
Alexseal premium paint, free color choice

# Customization

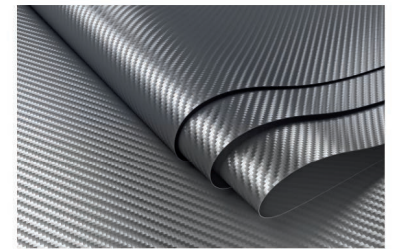

Mayla, my own.

Mayla are exceptional yachts for exceptional people. And because everyone is different, there will most unlikely be two identical Mayla yachts.

Clients are welcome to sit down with our representatives and chose to configure their Mayla GT in perfect adequation to their tastes and needs.

A wide array of possibilities will encourage them to select the perfect propulsion system, fine-tune the boat's ideal layout and exclusive equipment, and find the colors and textures match they love.

Because they are unique, Mayla owners are treated individually. Personalized service and advice is available globally and at any time.
